Estimating Square Roots

Name: \_\_\_\_\_

1) Complete the square root number line. The first 3 have been done for you.

2) Use the number line to estimate the following square roots. Use the 3 point system below:

a)  $\sqrt{39}$

- Between  $\sqrt{\quad}$  and  $\sqrt{\quad}$  but closer to  $\sqrt{\quad}$
- Answer is between  $\quad$  and  $\quad$  but closer to  $\quad$
- My estimate is  $\quad$

b)  $\sqrt{60}$

- Between  $\sqrt{\quad}$  and  $\sqrt{\quad}$  but closer to  $\sqrt{\quad}$
- Answer is between  $\quad$  and  $\quad$  but closer to  $\quad$
- My estimate is  $\quad$

c)  $\sqrt{90}$

- Between  $\sqrt{\quad}$  and  $\sqrt{\quad}$  but closer to  $\sqrt{\quad}$
- Answer is between  $\quad$  and  $\quad$  but closer to  $\quad$
- My estimate is  $\quad$

d)  $\sqrt{165}$

- Between  $\sqrt{\quad}$  and  $\sqrt{\quad}$  but closer to  $\sqrt{\quad}$
- Answer is between  $\quad$  and  $\quad$  but closer to  $\quad$
- My estimate is  $\quad$

e)  $\sqrt{206}$

## Estimating Irrational Square Roots (pp. 2 of 2)

### Guided Practice:

- Identify the two integers that the square root is between.
- Locate the two integers on a number line.
- Locate the approximated square root on the number line between the two integers.
- Estimate the square root of each irrational number to the nearest tenth. Your answer must be on the correct "half of the half" between the two integers that are boundaries for the square root.

1.  $\sqrt{28}$

2.  $\sqrt{51}$

3.  $\sqrt{22}$

4.  $\sqrt{39}$

5.  $\sqrt{27}$
